

Our Promise to You

Headquartered in Johannesburg, South Africa, Steel Building Projects is a wholly South African owned company with a national and continental reach into Africa and the rest of the world.

As part of the Trustbou Consortium, Steel Building Projects boasts the backing of a group of established companies, some of which have been in business since 1919. Consequently we pride ourselves on the fact that any guarantees given by us have real substance to them.

Because we know your steel building investment is important to you, we can safely promise you:

- Best Value
- Best Quality
- Best Design

All with absolute Peace of Mind that your building/s will be delivered:

- On Time
- Every Time
- Exactly as Promised

Steel Building Projects Design and Build Worldwide

Purchasing a new steel structure is an important decision. Thousands of people and organizations throughout the world have made the Trustbou Consortium their choice. If you want a premium quality structure at an affordable price, from a company you can trust, look no further than the Trustbou Consortium.

The space and facility needs for various kinds of business are as varied as the products that they produce. As an industry leader in steel buildings, SBP can provide a building for virtually any need or application.

The modern computer equipped structural design offices and engineers are able to design almost any type of structure.

Specialties are INDUSTRIAL BUILDINGS of every type, as well as SPORTS STADIA, AIRCRAFT HANGARS, WAREHOUSES, GRAIN STORES, BRIDGES, etc.

We also provide cladding, insulation, overhead cranes, gantries, doors, windows, ventilation and all the accessories needed for the complete structure.

We know that unfortunately, not everyone out there is reputable and trustworthy. We at the Trustbou Consortium are determined to go out of our way to earn your trust and we believe we can do exactly that.

Our buildings are designed and manufactured at our South African production facility to the highest standard possible in 6000M2 of factory space situated on 6.3Ha of yard space.

All the necessary machinery and technology is housed in some 15 separate divisions to achieve the manufacture of some 500 top-quality buildings each year.

All our building designs are backed up with expertise and major engineering knowledge. We go to great lengths to ensure that your

structure exceeds all requirements both for purpose and location, and we're one of a limited few firms that can offer this guarantee. Our engineering and testing teams take into account everything from wind, rain and snow to weight and location. We even rate the wind strength of the area you live in.

All of our building materials are supplied by reputable and professionally accredited firms and all our materials are manufactured to the highest SABS Standards, using high-quality S355JR-section steel (old grade was 350WA).

So relax, SBP really can build it better.

Our Promise to You

We can promise you that with our extensive experience you can build your steel building beautifully, with full "at ease" confidence that it will be done:

- Professionally
- Exactly as YOU want it done
- Comfortably within budget, and
- Always on Time.
